forward.

Leading forward.

Everyone knows them; street signs, bike signposts and the large blue signage mounted above motorways. They are simply part of the public space and we cannot imagine life without them. AGMI Traffic & Lighting provides signage, support structures, electrical products and tunnel safety products that contribute to safe solutions to infrastructure issues. What is that AGMI Traffic & Lighting special touch, though?

About AGMI Traffic & Lighting

Leading forward in traffic solutions

AGMI Traffic & Lighting is a prominent authority in the field of signs, signage, support structures and tunnel safety products. For over 70 years, it has been our goal to take the lead in sustainability, quality and safety. Our accumulated expertise enables us to provide innovative solutions using only proven technologies in our products and production processes.

Capitalising on developments

The traffic world is changing constantly with new solutions for visual information systems and dynamic signage. Flexibility, knowledge and expertise are hard-coded into AGMI Traffic & Lighting's DNA, ensuring we can quickly and easily anticipate the changing market requirements.

Smart final products

We prefer to lead the charge when it comes to new developments, which is why we pride ourselves on being inventive. This ingenuity is shown in our endeavour to transform existing and proven technologies into a smart final product. For example, we introduced new blue signage made of aluminium, we were the first to introduce LED lighting in the Netherlands in collaboration with ANWB, we have expanded our product range with aluminium overhead support structures and are currently market leader in tunnel safety products.

The most important link

All employees at AGMI Traffic & Lighting are an indispensable link in the production chain, and we consider every aspect of the organisation to be an essential element for delivering top quality. This keeps us on our toes and continually drives us to keep looking ahead and improve every day.

Guaranteeing production processes

- Work instructions
- Automation (ERP)
- Standardisation of processes and products

"Our proven expertise enables us to provide inventive solutions."

Project management and production under one roof

Leading forward in expertise

Project management

Our passionate project managers are known for their product expertise. They know exactly which legal guidelines our products have to conform with and take care of things like strength calculations, technical questions, permits and comprehensive delivery reports.

"Our project managers support you at every step of the process in order to achieve the desired project results."

Advice and support

In addition to having extensive product knowledge, our project managers are also responsible for a timely and correct execution of products. They support you at every step of the process in order to achieve the desired project results. In addition, they will also consult with you on solutions and applications that lead to the best results if there is a possibility to do so.

Engineering

Our engineers design, calculate and test the products in keeping with legislation and guidelines.

Production

Our production processes are carried out at our own production facility and fully comply with all applicable laws and regulations (CE, NEN-EN-ISO 9001, NEN-EN 1090-3 and VCA**). This way, you can rest assured that our final products always meet the agreed-upon quality standards..

Our certificates

Leading forward in responsibility

Our clients can reasonably expect all our products and services to meet the highest requirements with regard to quality, sustainability and safety. We use comprehensive certification and standards not only to safeguard our methods, but also to prove that our products and services meet these requirements. This gives our clients the confidence and security that their order is in safe hands.

NEN-EN-ISO 9001

We continually optimise our processes, during which we structurally improve our quality management.

NEN-EN 1090-3

Welding certificate to safeguard the quality and production processes of our aluminium support structures.

CE

Our products meet the requirements of the European Economic Area

EUROCODES

The design and calculations of our aluminium structures and foundations have been tested for constructional safety.

CRADLE TO CRADLE

Our signage, support structures and tunnel lighting are manufactured in such a way that the materials used in one product can be reused as raw materials for another product without quality loss.

CO² PRESTATIELADDER

We have achieved level 5 on the ladder, which shows we act CO₂- consciously, for example by saving energy, making efficient use of materials and using sustainable energy.

NEN-EN-ISO 14001

We conduct our operations in an environmentally responsible and sustainable manner with the help of an environmental management system in order to control the environmental risks of our business operations and reduce them where possible.

VCA**

The VCA** certificate proves that we, as primary contractor, properly assess, control and structurally safeguard the risks concerning the health and safety of our operational staff.

The certificates can be downloaded from our website: www.agmi.nl

Our product groups

Leading forward in future-proof solutions

Because we only focus on a limited number of product groups, these products are guaranteed our full attention. This allows for additional safeguarding and continuous development of our products.

AGMI Traffic & Lighting offers:

1. Signage (with matching support structures)
2. Signs
3. Electrical products
4. Tunnel safety products

Our product groups

1. Signage

With the right signage, we can promote road safety and smooth traffic flows. Naturally, our signage complies with the Eurocodes.

We offer:

- Aluminium roadside signs
- Aluminium mast signs
- Aluminium overhead signs
- Rotational panels
- Steel roadside signs
- Lightbox panels
- Intersection signage
- Small intersection signage
- Signage for pedestrians
- Signage for cyclists

Support structures

- Aluminium tubular overhead sign support structure
- Aluminium T-mast
- Aluminium mast arm
- Aluminium overhead traffic light support structure
- Masts (aluminium and steel)
- Scaffolding (aluminium and steel)
- Foundation (steel and concrete)

Construction substructure and superstructure

We use aluminium for the superstructure of our signage products, which we process in our own factory. If so desired, we can also use steel for these structures. We use bailers, ground anchors and foundations made of concrete for the substructure.

Signage installation

We work closely together with experienced and specialised installation companies that work according to our installation instructions. This way, safety and quality are guaranteed.

Saving time

With a view to efficiency, we instruct our engineers to design a product that can easily be transported and installed. In addition, the production hall is equipped with two overhead cranes and special transport racks to ensure a smooth and swift loading process.

Signage delivery

After delivery you will receive a complete delivery report, which will contain the following documents:

- As-built drawings
- Strength calculations
- Product certificates
- Pictures of delivery

In addition to the above, the delivery report of our support structures also contains material certificates and documents in accordance with VDC guidelines.

Our product groups

2. Signs

Proper and clear information concerning traffic conditions are necessary to ensure traffic safety and smooth traffic flows. Traffic signs play an important role in this.

We offer:

- Traffic signs
- Street signs
- Temporary signs

Ultimate Signing™

Our signs are also available in Ultimate Signing™ design, the new standard for traffic signs. Ultimate Signing™ signs are manufactured in the most sustainable manner using pre-coated carrier and printed image plane.

3. Electrical products

The components we use for our electrical products always comply with the latest standards.

We offer:

- Rotational panels
- Parking information systems
- Parking meters
- AVOP (Attention Pedestrian Crossing)
- VOP (Pedestrian Crossing)
- Speed visors
- Underpass lights

"We consider it our duty to take the lead in sustainability, quality and safety."

4. Tunnel safety products

With over 35 years of experience in the field of impact-resistant lighting and safety equipment for tunnels and underpasses, AGMI Traffic & Lighting could be considered the largest and most reliable market player in their field of business. In this, safety and quality are the company's main priorities.

We offer:

- Impact-resistant lighting
- Dynamic escape sign luminaires
- Emergency luminaires
- Contour illumination
- Sound beacons
 - Emergency station indicators
 - After-glow signs
 - Evacuation systems for railways

Important advantages

Our tunnel safety products are equipped with the most recent LED lighting technology and matching controls. Thanks to the modular construction of our products, we can design and produce them in accordance with our client's requirements. By using proven technologies in our products, you can always be assured of a demonstrably reliable product. Our engineers are happy to consult with you on this.

Design

The interior design of a tunnel requires specialist knowledge. With our experience and expertise, we can assist you with the following aspects:

- Analysing client requirements and associated standards and guidelines
- Providing calculations and designs
- Demonstrating and verifying requirements
- Offering advice concerning installation and maintenance
- Providing delivery documents

The work described above will be performed by our expert team of project managers and engineers. That way, you can be assured of a smooth and correct delivery of your project.

Production

Engineering and production of the desired fixtures are performed in-house. That way, you are assured of an efficient process throughout the entire chain, while doing business with a company that takes full responsibility for its products.

Leading forward.
