AVOP

- Slagvast
- Bewezen technologie
- Hoog afdichtingsniveau
- Zeer hoog afwerkingsniveau
- Lange levensduur LED lichtbron 80.000 branduren

Our AVOP systems

Both inside and outside of built-up areas, more and more crossings for pedestrians and cyclist are being built within the framework of Sustainable Safety Traffic. The AVOP makes crossover facilities clearly visible for motorized traffic. This is achieved by applying internal lighting and fluorescent foil.

Important advantages

- Impact resistant
- Proven technology
- High sealing level (comparable to IP65)
- Very high finishing level
- Long lifespan of LED light (80,000 hours)
- Different options possible regarding the following:
 - - Single-sided or double-sided
 - - Other dimensions
 - - Other icons
 - - Solar energy or electricity
 - - Power supply via public lighting

Electrical properties

- LED-lighting
- Power supply: 230 VAC
- Power internal lighting 1 x 11W
- Power beam 2 x 10.8W
- Colour temperature lighting: 6500K
- Suitable for solar panel

Mechanical properties

- Material housing curved aluminum extrusion
- Dimensions L x W x H - 1100 x 1100 x 200 mm
- Impact resistance polycarbonate
- Weight 20kg

Mechanical properties

- Colour RAL 7032 (grey)
- Temperature range -30°C to +60°C

Quality

- Degree of protection IP66
- LEDs and power supply CE certified
- Technical lifespan 80,000 hours (approx. 10 years)
- Two-year warranty (last year descending)
