Road Direction Signs

- Good readability
- Easy manageable

Description

In the Netherlands there are many road direction signs on which information about the direction to be followed is displayed. It is an unlit signpost, which is clearly visible to the road user by means of applying a retro-reflective film layer. Road direction signs are, usually, placed on roads with an unlocking function. Moreover, road direction signs are also used at intersections where no connection to a power supply for an enlightening road sign is possible.

Important advantages

- Good readability
- Easy manageable

Mechanical properties

- Dimensions L x W x H 1627 x 60/46 x 485
- Stainless steel housing material
- Material plates aluminum
- Foil retro-reflective class 3
- Weight 19kg
- Temperature range -30 ° C to + 60 ° C
